We don't have the Winter Blues

BUTLER VA MEDICAL CENTER

It may be cold outside, but QproQ has a number of coals in the fire as business has been warming up! In these tough economic times, we continue to experience good fortune by providing engineering services to the Healthcare sector of the Federal Government and to State Educational Institutions.

One hot news item that we're happy to report is that QproQ was selected to provide prime design consultant services for the design and renovation of loading docks at the Butler VAMC. Included in the overall project is the demolition and replacement of existing loading docks, road-widening, re-grading and site retaining wall design.

It seems like quality work leads to repeat work! We always like to build on relationships and draw on past experience. The following projects are great examples of this principle.

- ⇒ We've followed up the work we did on the Lycoming Hall project at Bloomsburg University with addition and renovation work on the Columbia Residence Hall at the University.
- ⇒ To add to our list of bridge projects, we are providing engineering services to Clifford Township for the Mudd Road Bridge replacement project.

On a lighter note...For all of you that may be feeling the winter blues, we'll try to help melt them away by bringing back some **Florida sunshine!** We're scheduled to visit the Miami VAMC at the end of the month.
