Business is Blooming

With the arrival of spring, QproQ is excited about the development of new projects and the maturity of those recently completed. Seeds planted in 2009 have resulted in the design completion of Elwell Residence Hall at Bloomsburg University, which is now in construction. We also recently completed the foundation design for two warehouses in Pittston, and are nearly complete with the design for a steel truss bridge restoration in Wyoming County.

As the weather is warming up, our business is definitely not cooling down. We are currently working on an underpinning project for Bradford County School District. Upgrades continue at Wilkes-Barre VA Medical Center, with an eighth floor sleep lab renovation and plumbing upgrade. We are also preparing for the start of an open-end services contract at Martinsburg VA Medical Center.

Wherever your project is located, call or email us for your engineering needs. We will quickly respond to your inquiries, and will provide the timely and economical result our clients have come to expect from QproQ. Thank you for your continued commitment to QproQ Engineering, Inc.
