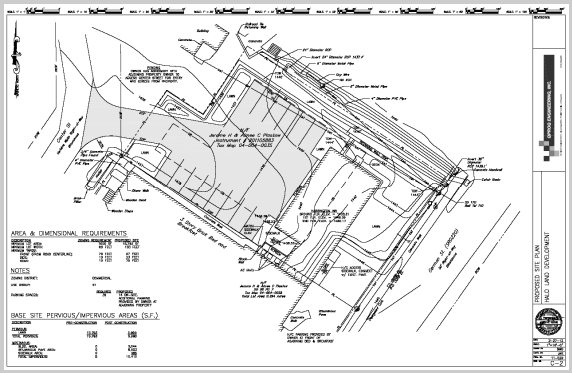
YEARS OF EXCELLENCE
QPROQ ENGINEERING, INC.

No Need for Hunger Games Here!

Katniss Everdeen may be the girl on fire, but QproQ is the firm on fire! This spring we are watching the construction of our recently completed projects. These projects include Elwell Residence Hall at Bloomsburg University, an eighth floor sleep lab renovation and plumbing upgrade at Wilkes-Barre VA Medical Center, land development for a Dushore extended living facility, as well as land development and the design of a Helium Transfill System building for a local supplier. Recently, we also completed an OSHA Load Rating analysis for a local manufacturer.

We are currently working on an open-end services contract at the Martinsburg VA Medical Center, which includes pool and boiler plant upgrades, as well as foundation designs for multiple warehouses in Pittston. Soon, we will be in Florida to begin work on a VA Medical Center.


Wherever your project is located, bet on us! Call or email us for your engineering needs. We will quickly respond to your inquiries, and will provide the timely and service our clients have come to expect from QproQ. Thank you for your continued commitment to QproQ Engineering, Inc.
