Every Day a Work Day

- ⇒ Listening to the street chatter, it sounds like the birds could be singing a little bit more cheerfully for the building construction industry. Fortunately, while we may be using less oil, the ink continues to flow smoothly onto our drawings at QproQ.
- ⇒ Recently, we began construction of a residence hall addition at Bloomsburg University.
- ⇒ Manufacturers continue to call on us for equipment installations and renovations. In fact, we recently started providing weekly on-site engineering services for an international manufacturer. That will definitely help get us through the next year of uncertainty.
- ⇒ As has been the case for the past decade, the healthcare industry is a staple of our client base as we provided engineering services for the Albany, Erie and Tampa VA Medical Centers during the past quarter.
- ⇒ Finally, the development industry in Northeast PA continues to produce as evidenced by the pre-engineered metal building construction taking place in local business and industrial parks.
- ⇒ The past quarter has been not too exciting; however, we have been working every day and we appreciate the opportunity to continue providing engineering services for you all and look forward to a prosperous 2008,
